ANNEX 7

SUBSEQUENT ANNUAL REPORTING

Section 4.8 of this Allocation Agreement references Annex 7 to determine the conditions under which Participating Municipalities are required to provide, in the annual report to be submitted to Treasury, data on private financing occurring after the loan/investment closing. Reporting this data for subsequent years allows the SSBCI to determine program effectiveness in achieving the Participating Municipalities' projected 10 to 1 private leveraging expectation across all Approved Municipal Programs and the projected 1 to 1 private leveraging requirement for each Approved Municipal Program that is an OCSP.

Section 3006(c) of the Act includes the following eligibility criteria referencing the 10 to 1 private leverage expectation for OCSPs: "For a Municipality other credit support program to be approved under this section, that program shall be required to be a program of the Municipality that... can demonstrate a reasonable expectation that, when considered with all other Municipal programs of the Municipality, such Municipality programs together have the ability to use the amount of new Federal contributions to, or for the account of, all such new programs in the Municipality to cause and result in amounts of new small business lending at least 10 times the new Federal contribution amount."

I. Definitions for use in this Annex. Terms used in this Annex that are not defined shall have the same meaning as in the Act and this Agreement.

Cumulative Private Leverage Ratio for all Approved Municipal Programs. "Cumulative Private Leverage for all Approved Municipal Programs" shall mean the result of dividing the Total Cumulative Private Financing Generated by all Approved Municipal Programs by the Total SSBCI Funds Used by all Approved Municipal Programs. This resulting weighted average is known as the Cumulative Private Leverage ratio formula which is outlined below and reflects the Participating Municipality's ability to meet its reasonable expectation of 10 to 1 leveraging to date.

Cumulative Private Leverage Ratio for Individual Approved

(STATE SMALL BUSINESS CREDIT INITIATIVE ACT OF 2010)

OCSP Program. "Cumulative Private Leverage Ratio for Individual Approved OCSP Program" shall mean the result of dividing the Total Cumulative Private Financing Generated by the individual Approved OCSP Municipal Program by the Total SSBCI Funds Used by the individual Approved OCSP Municipal Program. This resulting figure is known as the Cumulative Private Leverage ratio formula which is outlined below and reflects the Participating Municipality's ability to meet its leveraging requirement of 1 to 1.

Total Cumulative Private Financing Generated by all Approved Municipal Programs. "Total Cumulative Private Financing Generated by all Approved Municipal Programs" shall mean cumulative sum, to date of the reporting, of all private financing across all Approved Municipal Programs across the multiple years of the programs. This includes all loans or investments from a private source to an eligible borrower or eligible portfolio company, whether occurring at or subsequent to loan/investment closing, and whether funded or unfunded. It encompasses equity investments, written commitments of future equity investments, term loans, lines of credit, and any new infusions of cash by the borrower.

Total Cumulative Private Financing Generated by the Individual Approved Municipal OCSP Program. "Total Cumulative Private Financing Generated by the Individual Approved Municipal OCSP Program" shall mean the cumulative sum, to date of the reporting, of all private financing associated with one particular Approved Municipal Program across the multiple years of this program. This includes all loans or investments from a private source to an eligible borrower or eligible portfolio company, whether occurring at or subsequent to loan/investment closing, and whether funded or unfunded. It encompasses equity investments, written commitments of future equity investments, term loans, lines of credit, and any new infusions of cash by the borrower.

Total Cumulative SSBCI Funds Used by all Approved Municipal Programs. "Total Cumulative SSBCI Funds Used by all Approved Municipal Programs" shall mean the sum of those SSBCI funds which are, to date of the reporting, (a) deposited with a lender to cover the federal SSBCI contributions to a CAP reserve fund, (b) disbursed or committed to a specific borrower as part of a loan participation, collateral support, or direct lending program, (c) set aside to cover obligations arising from

(STATE SMALL BUSINESS CREDIT INITIATIVE ACT OF 2010)

individual loan guarantees, loan participations, or collateral support agreements to specific borrowers, or (d) invested or committed to be invested in specific businesses, pursuant to a venture capital investment. In the event that the sum of (a) plus (b) plus (c) plus (d) exceeds the Participating Municipality's original total allocation (because some of the funds invested have generated program income that has been added to allocated funds), the "Total SSBCI Funds Used by all Approved Municipal Programs" shall be the Participating Municipality's requested total allocation.

Total SSBCI Funds Used by the Individual Approved Municipal OCSP Program. "SSBCI Funds Used by the Individual Approved Municipal OCSP Program" shall mean the sum of those SSBCI funds which are, to date of the reporting (a) disbursed or committed to a specific borrower as part of a loan participation, collateral support, or direct lending program, and (b) set aside to cover obligations arising from individual loan guarantees, loan participations, or collateral support agreements to specific borrowers, and (c) invested or committed to be invested in specific businesses, pursuant to a venture capital investment. In the event that the sum of (a) plus (b) plus (c) exceeds the amount that the Participating Municipality's sub-allocation for that particular Approved Municipal OCSP Program (because some of the funds invested have generated program income that has been added to allocated funds), the "Total SSBCI Funds Used by all Approved Municipal Programs" shall be the Participating Municipality sub-allocation for that particular Approved Municipal OCSP Program.

II. Formulas for calculating leverage.

A. Calculating 10:1 Expectation.

Participating Municipalities calculate their leveraging for purposes of demonstrating a 10 to 1 ratio across all of their Approved Municipal Programs according to the following formula:

Cumulative Private Leverage Ratio for all Approved Municipal Programs = [Total Cumulative Private Financing Generated by all Approved Municipal Programs]/[Total Cumulative SSBCI Funds Used by all Approved Municipal Programs]

B. Calculating 1:1 Requirement for OCSPs.

Section 3006(c) also requires that each OCSP of a Participating Municipality demonstrate that, at a minimum, \$1 of public

(STATE SMALL BUSINESS CREDIT INITIATIVE ACT OF 2010)

investment by the Municipality program will cause and result in \$1 of new private credit. Participating Municipalities calculate their leveraging for purposes of demonstrating the statutorily required 1 to 1 ratio within an individual OCSP according to the following formula:

Cumulative Private Leverage Ratio for Individual Approved Municipality OCSP Program = [Total Cumulative Private Financing Generated by the Individual Approved Municipality OCSP Program]/[SSBCI Funds Used by the Individual Approved Municipal OCSP Program]

III. When Must a Participating Municipality Report Subsequent External Financing?

Generally, Participating Municipalities shall include in each year's annual report transaction-level data only on loans and investments closed in the reporting period year. CAP loans will be reported only once because the design of CAPs is such that they exceed the 10 to 1 private leverage ratio in the same reporting period as their closing.

However, Participating Municipalities must also include in their annual report the amount of subsequent private financing (that is caused by or resulting from the initial OCSP loan or investment) for every previously closed OCSP loan or investment if Total Cumulative Private Financing Generated by all Approved Municipal Programs, as reflected in its annual report, is less than 10 to 1. (Please see Section IV of this Annex to determine if the subsequent private financing obtained by a company receiving an earlier loan or investment from an Approved Municipal Program can be considered "caused by or resulting from the initial OCSP loan or investment.")

Even if the Participating Municipality has achieved the 10 to 1 private leverage ratio in a given reporting year, if the Participating Municipality operates an Approved Municipal OCSP Program that has not met the 1 to 1 private leverage ratio required of individual OCSPs, the Participating Municipality must also include in its annual the amount of subsequent private financing (that is caused by or resulting for the initial OCSP loan or investment) for every previously closed loan or investment enrolled in the non-compliant Approved OCSP Municipal Program. This reporting on subsequent private investment associated with prior loans or investments must continue until that OCSP program has achieved the 1 to 1 private leverage

ratio. (Please see Section IV of this Annex to determine if the subsequent private financing obtained by a company receiving an earlier loan or investment from an Approved Municipal Program can be considered "caused by or resulting from the initial OCSP loan or investment.")

The Participating Municipality has the option to report subsequent financing for previously closed OCSP loans or investments if their Total Cumulative Private Financing Generated by all Approved Municipal Programs has already exceeded 10 to 1. Under these circumstances, reporting is not mandatory.

Please see Exhibit 7-1 for a flowchart summarizing how to determine whether a Participating Municipality must report subsequent private financing for OCSP loans and investments.

IV. When Is Subsequent Financing Caused by, or Resulting from, the Initial SSBCI-supported OCSP Financing?

Subsequent financing may be considered to be caused by, or resulting from, the initial SSBCI-supported OCSP financing when the initial SSBCI-supported OCSP financing increases the current and future creditworthiness of a company. If the Participating Municipality is required to report subsequent private financing, either for all OCSP programs or for a particular OCSP program, the Participating Municipality should record an amount greater than \$0 only when the subsequent private financing is caused by, or resulting from, the initial SSBCI-supported OCSP financing, based on the guidance provided below.

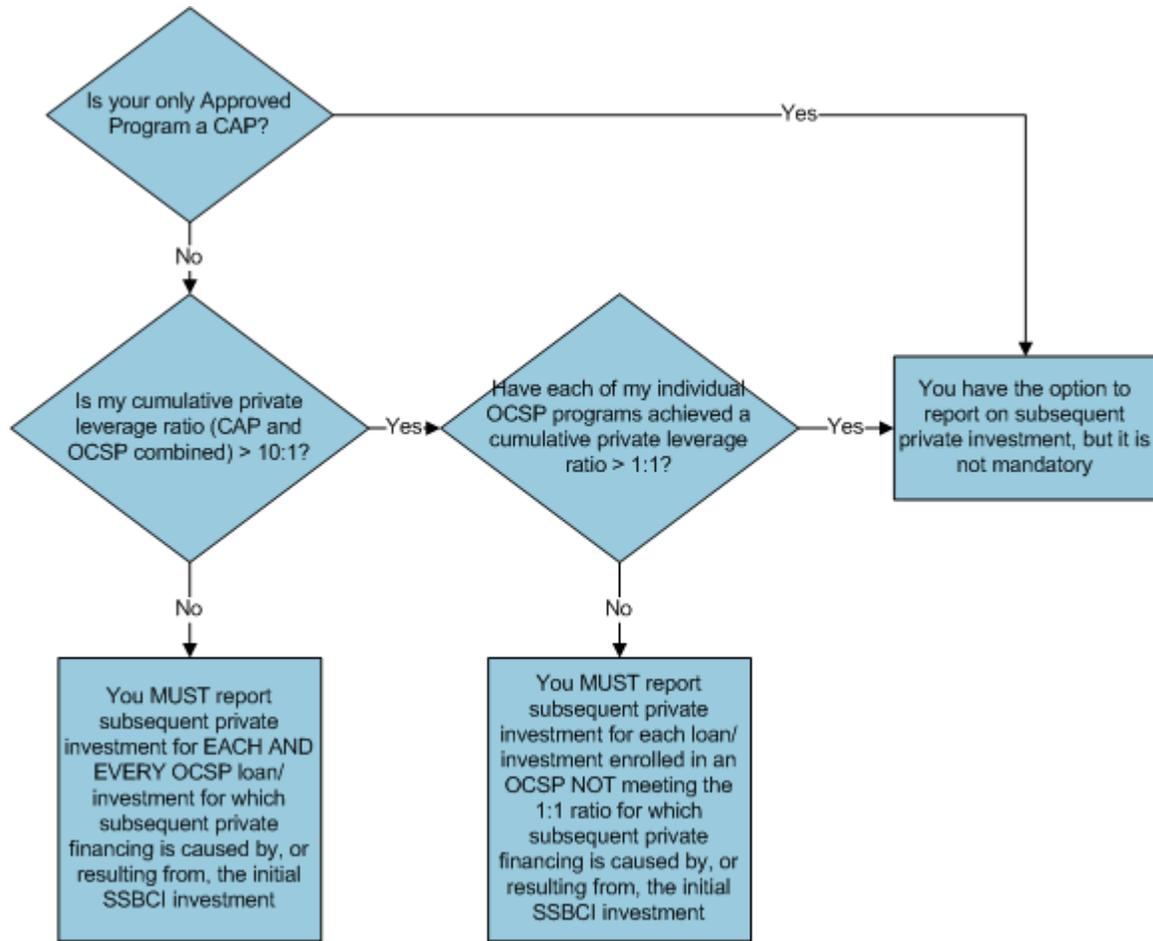

For example, some loans or investments made under venture capital programs, or direct loan or loan participation programs, satisfy this condition. By investing equity or subordinated debt, their financing can directly strengthen a company's balance sheet and allow it to (a) acquire assets that can collateralize a bank loan or (b) increase the cash available to service bank debt. The direct nexus between the initial SSBCI-supported loan/investment and subsequent private financing occurs only when the initial loan/investment is a form of subordinate, mezzanine or equity financing – in other words a form of financing that actually strengthens the company's balance sheet or that can be used to secure or repay debt. Therefore, Participating Municipalities should record subsequent private financing for venture capital investments, direct loans, or loans enrolled in loan participation programs only when the

(STATE SMALL BUSINESS CREDIT INITIATIVE ACT OF 2010)

initial loan/investment involves subordinate, mezzanine, or equity financing.

Loan guarantee and collateral support programs, in contrast, are designed to reduce the current risk associated with funding a company with weaker collateral or cash flow projections. Generally, these types of programs do not directly add assets to a company's balance sheet that improve its creditworthiness for further loans or investments. For this reason, the Participating Municipality should record subsequent private financing for these types of investments as \$0, unless the Participating Municipality has received explicit permission from Treasury, based on Treasury's review of the structure of the Participating Municipality's program(s).
